Summer - 2017

SUMMER DISCOVERY

Nanbo Discovery Camp, our English language residential summer camp is located in Chikura, Chiba prefecture, two hours southeast of Tokyo. Campers are usually in grade two through middle school.

Our campers enjoy an adventure of swimming, snorkeling, cycling, sports, hiking, exploration and discovery, science, arts and crafts and much more. Whether they are observing life in a tide pool, collecting shells, cycling over the next hill or body boarding at the beach, all campers will have an active, positive, educational, fun and safe camp adventure.

Equally important, they will be building confidence and self-esteem, overcoming challenges, and working together to build relationships with other campers and counselors in a positive camp environment.

Journal writing and drawing are daily activities at Nanbo Discovery Camp that allow all of us time to reflect on the day through discussion, writing and sketching. Campers will bring their journals and art work home at the end of camp.

We are up early every morning starting the day with hiking, fun exercises at the beach or on the activity field. Beach clean-up for one morning as a community service is an important part of our program. Campers are "kitchen helpers" for a day assisting with meals in small groups. Each day ends with activities around the campfire, in the Discovery Room or on a night hike. Campers sleep in one of four bunk rooms with a counselor.

SUMMER FUN

The Nanbo Discovery Camp senior staff consists of experienced international school educators. Upper class high school and university students make up our counselor staff. They are mostly bilingual, all mature, responsible and caring young adults. Many have been campers at Nanbo. We have a counselor-in-training program that allows early adolescent students to develop leadership skills, gain in confidence, and have fun as campers at the same time.

Our campers are usually between seven and 14 years old (grade two through middle school) and are grouped together for most activities.

We accept a limited number of campers with low English proficiency into each session. It is important to understand that the language of our camp is English. Campers often stay for one, two or more sessions. Our camper/staff ratio is about 3:1, reflecting our strong commitment to a safe camp environment.

Go to our photo gallery to see photo albums of summer camp, our lodge, and much more.
